## Performance

Values are estimated and may vary. The [performance score is calculated](#) directly from these metrics. [See calculator.](#)

0–49

50–89

90–100

### METRICS

[Expand view](#)

First Contentful Paint

0.8 s

Largest Contentful Paint

9.6 s

● Total Blocking Time

0 ms

● Cumulative Layout Shift

0.01

● Speed Index

1.2 s

Show audits relevant to: [All](#) [FCP](#) [LCP](#) [TBT](#) [CLS](#)

## INSIGHTS

▲ Use efficient cache lifetimes — Est savings of 27,727 KiB

▲ Improve image delivery — Est savings of 22,306 KiB

▲ Render-blocking requests — Est savings of 440 ms

▲ LCP request discovery

▲ Network dependency tree

○ Layout shift culprits

○ LCP breakdown

○ 3rd parties

These insights are also available in the Chrome DevTools Performance Panel - [record a trace](#) to view more detailed information.

## DIAGNOSTICS

■ Image elements do not have explicit **width** and **height**

■ Minify CSS — Est savings of 5 KiB

■ Reduce unused JavaScript — Est savings of 74 KiB

■ Avoid enormous network payloads — Total size was 30,349 KiB

○ Avoid long main-thread tasks — 1 long task found

More information about the performance of your application. These numbers don't [directly affect](#) the Performance score.

## Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

### NAMES AND LABELS

|                                                              |   |
|--------------------------------------------------------------|---|
| ▲ Image elements do not have <code>[alt]</code> attributes   | ▼ |
| ▲ Form elements do not have associated labels                | ▼ |
| ▲ Document doesn't have a <code>&lt;title&gt;</code> element | ▼ |
| ▲ Links do not have a discernible name                       | ▼ |

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

### CONTRAST

|                                                                             |   |
|-----------------------------------------------------------------------------|---|
| ▲ Background and foreground colors do not have a sufficient contrast ratio. | ▼ |
|-----------------------------------------------------------------------------|---|

These are opportunities to improve the legibility of your content.

### INTERNATIONALIZATION AND LOCALIZATION

|                                                                                   |   |
|-----------------------------------------------------------------------------------|---|
| ▲ <code>&lt;html&gt;</code> element does not have a <code>[lang]</code> attribute | ▼ |
|-----------------------------------------------------------------------------------|---|

These are opportunities to improve the interpretation of your content by users in different locales.

### NAVIGATION

|                                                               |   |
|---------------------------------------------------------------|---|
| ▲ Heading elements are not in a sequentially-descending order | ▼ |
|---------------------------------------------------------------|---|

These are opportunities to improve keyboard navigation in your application.

BEST PRACTICES

|                                                                                                                           |   |
|---------------------------------------------------------------------------------------------------------------------------|---|
|  Document does not have a main landmark. | ▼ |
|---------------------------------------------------------------------------------------------------------------------------|---|

These items highlight common accessibility best practices.

TRUST AND SAFETY

|                                                                   |   |
|-------------------------------------------------------------------|---|
| <input type="radio"/> Ensure CSP is effective against XSS attacks | ▼ |
| <input type="radio"/> Use a strong HSTS policy                    | ▼ |
| <input type="radio"/> Ensure proper origin isolation with COOP    | ▼ |
| <input type="radio"/> Mitigate clickjacking with XFO or CSP       | ▼ |
| <input type="radio"/> Mitigate DOM-based XSS with Trusted Types   | ▼ |

GENERAL

|                                                     |   |
|-----------------------------------------------------|---|
| <input type="radio"/> Detected JavaScript libraries | ▼ |
|-----------------------------------------------------|---|

PASSED AUDITS (13) Show

SEO

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on [Core Web Vitals](#). [Learn more about Google Search Essentials](#).

CONTENT BEST PRACTICES

|                                               |   |
|-----------------------------------------------|---|
| ▲ Document doesn't have a <title> element     | ▼ |
| ▲ Document does not have a meta description   | ▼ |
| ▲ Image elements do not have [alt] attributes | ▼ |

Format your HTML in a way that enables crawlers to better understand your app’s content.
